ABOUT SHATTERED LEGION

SLG

GAMEFI NFT DAO

CARTOON WASTELAND AESTHETIC

Shattered Legion is a MMO Strategy Blockchain game set in a post-apocalytic wasteland where warring factions run by warlords, cult leaders, and delinquents have taken over and are in a constant struggle for land and resources. With thrilling and nuanced PVE and PVP gameplay, the opportunity to make real money, and a sustainable and fair economic system.

Deployed on the BSC network with a robust economic system based on Hero and Mech NFTs, Land Ownership, and XTAL Crystals, Shattered Legion seeks to become the future of the SLG genre in the wake of the GameFi revolution.

Shattered Legion

Axie INFINITY

CryptoMines

While traditional games can have addictive gameplay, there is no sense of ownership or meaningful investment in the game because there is no way to redeem the income users expected from the investment. Shattered Legion has the potential to decode the above difficulties.

The system emphasizes remaining approachable to new players long after launch through mechanics like providing accessible materials for novice players to help them familiarize themselves with the game and initial growth early. An unlocking mechanism for the player's city development and resource acquisition is regulated. Moreover, offering world-class gameplay on par with any conventional SLG game means that all players have a fair chance to play the game and be rewarded.

SLG pays high

Shattered Legion's gameplay logic and values are benchmarked against products such as COK, ROK, and Pocket Raiders. The global average quarterly turnover of these products is about 60 million to 90 million US dollars. Global users of the SLG category have always had a stable payment power and user base.

SLG has a long life cycle

The advantages of SLG games are long life cycle, deep gameplay and growth values, social driving force with PVP and activities, and high player loyalty and activity.

Seize GameFi in the SLG field

The gameplay of Shattered Legion integrates the core features of SLG games. At present, SLG, a category with a large fan base, is still blank in the GameFi field, so users can experience new products as soon as possible. The more important significance is to guide SLG enthusiasts to the GameFi world.

Innovation section

Conquest digs deep into the economic attributes of SLG, and integrates world map PVP, accumulated resources, land finance and social functions into economic model.

ABOUT SLG-GAMEFI

Shattered Legion gameplay incorporates the core features of SLG games, with strategy and social interaction based on the growth of players.The advantages of SLG games are that they have a long life cycle, use PVP as a social driving force, and have high player loyalty and activity.The game deeply excavates the economic attributes of SLG, and integrates the world map PVP, accumulated resources and social functions into the economic model.

BUILD THE FIRST OPEN WORLD STRATEGY ENTHUSIAST COMMUNITY ON THE BLOCKCHAIN

GameFi
The most advanced public chain and game production technology are adopted to realize the decentralization of game virtual assets.

NFT Value
SLG uses the inherited solid smart contract standards of ERC721 and ERC1155 to make the generation.

0 Cost Participation
Players only need to download an app and register to participate in the game. They can create their own kingdom in the game from scratch.

Economic System
Blockchain takes the discovery and supply of game value from game developers, which are jointly created by developers and players.

Gather & Hunt

PVP

Attack
Player-to-player fights.

Alliance War
In the mutual attack between alliances, in addition to allies attacking each other, they can also attack the buildings in the other alliance's territory.

World War
Multiple alliances can form alliances and compete to seize the fortress in the center of the world. Many alliances can participate, and the winner will be awarded the title of conqueror. World War is season based.

PVE

Battle
Players need to rely on their own heroes to complete the campaign levels.

World Evil
There are many hostile NPCs in the world map, bandits, warlords, thieves, etc., players assign hero troops to fight and can get a lot of rewards.

World Boss
World bosses will appear on the world map from time to time, and there will be different bosses in different events or periods. All players can fight together and get special rewards.

BECOME A LORD

With limited resources and no governing force, Will you be the one to change it? Or will you be a warlord hell-bent on conquering the world for yourself?It's time to enter Shattered Legion.

DUAL-TOKEN & 1 IN-GAME CURRENCY SYSTEM

The SLG ecosystem contains two tokens $SLG, $XTAL, and one in-game currency SLG GOLD.

$ SLG

As a governance token, $SLG can only be used to exchange NFTs in the $SLG market.

$ XTAL

$XTAL is used as the reward currency in the game.

SLG GOLD

SLG GOLD is the currency in game. Players can use USDT to buy SLG GOLD.
